

## ***Conditions VFP/APSI Nursing Research Overview***

---

*Please refer to this document when considering the eligibility for uploading your project on our Swiss Nursing Research Overview.*

### **RESEARCH:**

- Any scientific, systematic and methodological investigation aiming to generate new relevant knowledge
- Project goes through a *research process*: rational, research aims, methods, results, scientific and public dissemination (publication, congress)
- If required, research protocol submitted and approved by the Human Research Ethics Committee or by the respective institutional board
- Research resulting from master's and doctoral theses are welcome as well

### **NURSING RESEARCH:**

- We consider a project a 'nursing research project' when the research question is relevant to nursing science or has a relevant contribution by a nurse scientist
- OR when a nurse is the Principal Investigator or a co-investigator and therefore mentioned as such in the research protocol  
*Note: Nurses only involved in data collection are generally not viewed as co-investigators (e.g., biomedical research nurse)*

### **SWISS NURSING RESEARCH:**

- Research conducted in Switzerland
- OR Research effected by a nursing researcher affiliated with an institution in Switzerland (university, university of applied sciences, hospital, institute...)
- The researcher does not have to be a member of VFP/APSI

***Please fill out the form in English.***
